Election/Restrictions

1. Claims 19-34, 37-39 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "2" has been used to designate both measuring arrangement and evaluation electronics. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. Claim 42 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 42 recites the limitation "said static pressure" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Response to Arguments

5. Applicant's arguments filed 3/3/03 have been fully considered but they are not persuasive. Applicant argues that the Nabity reference does not teach measuring the static pressure. Applicant's attention is directed to col. 6, lines 23-29 where a piezoelectric sensor senses the pressure against the conduit, which is nothing more than the static pressure. Furthermore, any person skilled in the art would have at least some knowledge that may provide modifications to the type of sensor to simplify the entire device.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 3-7, 9, 11-15, 35, and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Nabity et al. (5,701,646) (hereinafter Nabity).

Subject matter not found in this office action may be viewed in the prior office actions.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 8 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nabity in view of Meijer (5,165,873).

Subject matter not included in this office action may be viewed in the prior office action.

10. Claims 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nabity.

Subject matter not included in this office action may be viewed in the prior office action.

11. Claims 41-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nabity.

Nabity does not teach the pressure sensor contacting fluid with the fluid vessel and the pressure sensor sensing the pressure in the fluid relative to pressure acting on the vessel from outside.

Nabity measures the pressure difference within the conduit. It would have been obvious to a

Art Unit: 2855

person having ordinary skill in the art at the time the invention was made to measure pressure within the vessel with respect to the outside pressure (atmospheric pressure) since such measurements are nothing more than measuring differential pressure which does not require a second pressure measuring means to be inserted within the conduit or vessel.

12. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harshad Patel whose telephone number is (703) 305-4935. The examiner can normally be reached on Monday-Thursday (7:00 AM-5:30 PM).
